Selective Catalytic Reduction (Adblue) Light Reset

Model(s)	Year	Eng. Code	Trans. Code	VIN Range From	VIN Range To
Touareg	2011-2016	3.0L TDI (CATA CNRB)	All	All	All

Technical Background

Selective Catalytic Reduction (Adblue) reset procedure.

Service

- Connect the vehicle diagnostic tester.
- Erase all OBD DTC's.
- Warm engine to full operating temperature inside the shop.
- Go to Control Module OBD, Basic Settings select Check of SCR efficiency.
- If DTC P207F Reductant Quality Performance was stored also select checking wrong medium detection /or Checking reduction medium quality press blue forward arrow on the bottom right.
- The next screen on the left will show Check of SCR efficiency and Checking reduction medium quality and in the box on the right will show (VO)_not available. Press the blue forward arrow on the bottom right again.
- Now select status of basic settings and operating instructions both will move to the selection box on the right.
- Press forward arrow again.
- Verify engine is running, no pedals are pressed, vehicle in park, emergency brake is pulled, all doors and hood must be closed.
- Select Check of SCR efficiency in the basic settings box.
- Select start and operating instructions will show hold brake and accelerator pedal, test may take 30 minutes or more.
- Once test is complete system ok will show and the AdBlue light and Message miles to no start will be reset.
