BRAKE PRODUCTS

Proper STEMCO ABA Inspection Procedure

Do you have STEMCO Crewson ABAs manufactured between August 10, 2017 and May 4, 2018?

You have been identified as a customer who may have received STEMCO Automatic Brake Adjusters (ABAs) manufactured between August 10, 2017 and May 4, 2018 (Date codes 17222B-18124B). Due to a manufacturing assembly issue, some of these adjusters may experience an anomaly with the adjustment mechanism resulting in the ABA not fully adjusting the drum brakes under certain operating conditions. This issue does not present a safety concern regarding the ultimate function of standard vehicle braking systems. It is important, however, that you confirm if you have STEMCO ABAs in the date range and, if so, that you check and monitor their performance. Here is an example of a date code on an ABA for reference:

Following normal, regularly scheduled maintenance procedures should be sufficient to capture STEMCO ABA's with this issue. At the vehicle's next regularly scheduled inspection, use STEMCO [Tech Tip #112](#), to assure the function and correct set up. STEMCO will replace non-functional ABAs, within these manufacturing date codes, when they are returned through STEMCO's normal warranty process. Contact STEMCO Warranty Department at warranty@stemco.com or (903) 248-2980 for return information.

With this in mind, we've created the following valuable resources for ensuring you're getting the most from your Crewson™ Automatic Brake Adjusters:

- Download [TECH TIP #112: Proper STEMCO ABA Inspection Procedure](#).
- View the [STEMCO Crewson ABA Capabilities Overview](#) brochure.
- View the STEMCO Crewson ABA Installation Video:
