Subject: Upcoming Update 51G2 Rear Lid Software Update  
Certain 2018 Audi Q5

We would like to inform you of an upcoming Update, code 51G2.

**What vehicles are affected?**

There are 74,180 Audi vehicles in the U.S. and 14,095 vehicles in Canada affected by this Update. Check your daily campaign open inventory report or OMD for affected vehicles in your inventory.

**What is the issue?**

On certain vehicles manufactured within a specific period, the power-operated rear lid may open again immediately after the closing operation.

**What does the repair procedure involve?**

Perform a software update to the rear lid electronics.

**When will the Update be available?**

This Update will be visible in Elsa and ServiceNet on or about August 8, 2018.

Please refer to the Elsa campaign/action screen for confirmation of whether the Update applies to each specific vehicle. Additionally, this Update is posted on Elsa and ServiceNet for additional information and complete repair instructions.

Consistent with general Audi corporate policy governing Updates, Audi is not notifying consumers. (Updates differ from recalls and service actions; consumers are notified in writing of recalls and service actions.) Each vehicle should be completed when it is in to the dealer for maintenance or any other service visit. Dealer stock vehicles **cannot, however, be delivered** to consumers until the Update is completed.

To identify any vehicles in your inventory that are affected by this Update, please run the "New and CPO Inventory Open Campaign/Action Listing" report from the OMD Web system.

Dealers must ensure that every affected vehicle gets the update before delivery to consumers. Your effort is integral in reaching the highest quality expectations of Audi customers.

Thank you for your cooperation and assistance in this important matter.
