Incorrect VIN Stored in One or More Modules

Model(s)	Year	Eng. Code	Trans. Code	VIN Range From	VIN Range To
Routan	2009-2014	All	All	All	All

Technical Background

A module scan demonstrates that the incorrect VIN is stored in one or more modules. This may (or may not) cause faults to store such as mis-matched VIN, depending on the module that has the issue.

Service

Utilize wiTECH and go to the diagnostic procedures selection.

- Click on restore vehicle configuration.

At this point, the scan tool should ask you for the correct VIN.

- Carefully input the VIN.

Once completed:

- Clear the fault memory and verify that the correct VIN is now stored.
