QUALITY DRIVEN® SERVICE

SERVICE BULLETIN

APPLICABILITY: 2000MY to Current, All Models
SUBJECT: Replacement Key and Immobilizer Information

NUMBER: 01-168-09R
DATE: 06/17/09
Revised: 10/11/18

INTRODUCTION

The purpose of this bulletin is to provide replacement key and immobilizer information along with an overview of the Subaru Lock Information web-site.

OVERVIEW OF THE RETAILER-ONLY SUBARU LOCK INFORMATION SITE

The Subaru Lock Information Site (SLIS) is located at <http://lockinfo.subaru.com>, and provides information on how to obtain immobilizer codes and key cut codes for Subaru vehicles from the 2000MY to present. This bulletin identifies the equipment required to initialize (reset) the immobilizer code and cut the key blanks, for both immobilizer and non-immobilizer type keys. Subaru of America began using immobilizer systems in some 2005MY vehicles (please refer to Immobilizer Chart for more detailed information).

KEY BLANK TYPES

Subaru vehicles are equipped with either standard edge cut keys or high security laser cut keys. All high security keys are equipped with an immobilizer device installed. Some standard edge cut keys may or may not be equipped with an immobilizer device. Key blanks can be purchased through normal parts channels. The following page are examples of the Subaru key blank styles:

There are many different styles of key cuts. Be sure to order the correct blank for your particular application and verify your key cutting equipment is compatible. Master keys are shown below.

2005-2007 Legacy & Outback
edge cut key w/immobilizer (also
available without immobilizer)

2008-2011 Impreza, WRX, & STI
and 2012-2014 WRX & STI high
security laser cut key w/immobilizer

continued...

CAUTION: VEHICLE SERVICING PERFORMED BY UNTRAINED PERSONS COULD RESULT IN SERIOUS INJURY TO THOSE PERSONS OR TO OTHERS.

Subaru Service Bulletins are intended for use by professional technicians ONLY. They are written to inform those technicians of conditions that may occur in some vehicles, or to provide information that could assist in the proper servicing of the vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do the job correctly and safely. If a condition is described, DO NOT assume that this Service Bulletin applies to your vehicle, or that your vehicle will have that condition.

SUBARU OF AMERICA, INC. IS ISO 14001 COMPLIANT

ISO 14001 is the international standard for excellence in Environmental Management Systems. Please recycle or dispose of automotive products in a manner that is friendly to our environment and in accordance with all local, state and federal laws and regulations.

2008 Legacy, Outback, and Tribeca edge cut key w/immobilizer and keyless entry

2009-2013 Forester high security laser cut key w/immobilizer

2009 Legacy & Outback and 2009-2014 edge cut key w/immobilizer and keyless entry

2010-2014 Legacy & Outback high security standard laser cut key w/immobilizer and keyless entry

2012+ Impreza, 2013+ Crosstrek and 2014+ Forester, 2015+ Legacy & Outback, and 2015+ WRX & STI edge cut key w/immobilizer and keyless entry

2013+ BRZ edge cut key w/immobilizer and keyless entry

continued...

2013-2014 BRZ keyless access with push-button start system access key with inside cut high security laser cut emergency key, immobilizer, and keyless entry

2013-2014 Legacy & Outback keyless access with push-button start system access key with high security laser cut emergency key, immobilizer, and keyless entry

2014-2015 Forester, 2014 Crosstrek Hybrid, and 2015 WRX & STI keyless access with push-button start system access key with inside cut high security laser cut emergency key, immobilizer, and keyless entry. (Different part number and key cutting code from 2013 BRZ.)

2015+ BRZ, 2015+ Legacy, Outback, Impreza, Crosstrek and 2016+ WRX, WRX STI and Forester keyless access with push button start system access key with single-sided inside cut high security laser cut emergency key, immobilizer, and keyless entry.

≥ 2009	--	All	All	All	All	All	All	All

WEB SITE ACCESS: AUTOMOTIVE SECURITY PROFESSIONALS

The public-facing locksmith site (linked off of STIS, via the “Immobilizer Key Access” button), is a pay site for lock professionals.

WEB SITE ACCESS: AUTHORIZED SUBARU RETAILERS

Authorized Subaru Retailers can access SLIS through Subarunet (under the Service tab, or by directly following the URL <http://lockinfo.subaru.com>. Access to the immobilizer information is restricted to Subaru Dealership Service Managers and Parts Managers. Access will be granted by using the managers’ SKILS user name. No other employees can access the Subaru Immobilizer Database.

Note: It is the retailers’ responsibility to perform due diligence by entering or deleting employees in the SKILS Dealer Employee Maintenance Database. This is especially true of Service Manager and Parts Manager position changes.

Step by Step Process To Access the Site

- Once on the SLIS home page, the Service Manager or Parts Manager will be asked for their SKILS user name. At that time, if this is the first time he/she has logged on to the web site, the password “Welcome” should be used. He/she will then be prompted to create a new password (this will not change your current SKILS password).
- The Service Manager or Parts Manager will then be prompted to read the disclaimer and answer “accept” or “not accept”. If they answer “not accept”, the system will not let them access the immobilizer information.
- A page will then be displayed, allowing for entry of the full 17 character VIN of the vehicle in question.
- Provided the VIN is found in the database, the immobilizer Security ID along with the key/cutting code will appear.
- A charge of \$2.80 will be incurred for each immobilizer request.

Note: Costs are \$9.95 per transaction, or \$25.95 for a 24 hour subscription access (with no transaction limit).

SOA Warranty will only reimburse an approved warranty claim with an Immobilizer Code access cost of \$2.80 per transaction, as a sublet cost. The public-facing (professional locksmith) web site’s public access fees of \$9.95 and \$25.95 will be reduced to \$2.80 per transaction, if those fees are submitted as a part of a warranty claim.

NASTF SECURE DATA RELEASE MODEL (SDRM)

Positive Identification Policy

NASTF SDRM Subaru Parts and Service Managers who are registered in the Dealer Employee Maintenance Database and are designated as Registry Vehicle Security Professionals (VSPs) shall comply with the following **Positive Identification Policy** when servicing orders for keys, immobilizer reset, or other anti-theft services for vehicles:

1. **Inform the Customer** - At the time of initial request, ask the customer whether he or she has identification and authority for the service. Inform them of the requirements of this Positive Identification Policy.
2. **Complete the Form** - Upon arrival at the job site or when the customer comes in, the VSP shall complete an *Authorization for Automotive Key Generation and/or Immobilizer System / Anti-Theft Services* form (aka *Form D-1*, page 15) that asks for the name, address, phone number, driver's license, vehicle make, model and year, vehicle license plate number, Vehicle Identification Number (VIN), odometer reading, and disclaimer and signature. An invoice or work order that contains all identifying information, when stapled to a duly signed *Form D-1*, is acceptable for collection of this customer information. Subarunet.com user name should be used in place of LSID.
3. **Verify I.D.** - Verify the customer's valid photo ID and compare to the information provided by the customer on the authorization form. The customer must present a valid state issued driver's license as proof of identity to qualify for use of Registry services.
4. **Verify Authority** - Ask the customer to present proof of entitlement, which shall include at least one of the following: a valid registration certificate, a valid insurance ID card, a valid insurance policy, vehicle title or a certificate of ownership for the vehicle. The name and address on the proof of entitlement document must match the information on the driver's license to qualify for use of Registry services. In the event that necessary documentation is locked within the vehicle, the vehicle may be entered to verify the authority of the requestor. If upon entry to the vehicle, you are unable to verify the authority of the requestor, the vehicle shall be shut and locked. Do not produce a replacement key, do not provide any key related information to the requestor and destroy all information acquired from the automaker during the transaction.
5. **Ask for Signature** - Require the customer to read and sign *Form D-1*(page 15). The customer is attesting to:
 - a. the information given by the customer being correct and truthful,
 - b. the customer having the authority to obtain keys or immobilizer services for the vehicle and,
 - c. the customer agreeing to indemnify and hold harmless the service provider and related parties against liability.
6. **File the Form** - Keep the completed *Form D-1* on file for two (2) years, or longer as required by law.
7. **Compliance with Applicable Laws.** The VSP will take all other actions required by applicable laws. In the event of a conflict between the steps set forth herein and the applicable laws, the VSP should comply with applicable laws.
8. **Sublet work** - A mobile VSP doing work for a body shop, garage, or dealership may accept a legible photocopy of the picture I.D. in order to match it to the registration/title documents. This cannot be a faxed copy. The shop owner or manager must verify the customer's I.D. in person and attest they have done so by signing the bottom of the *Form D-1*

continued...

EQUIPMENT

The Subaru Diagnostic System (SDS) is required to reprogram Subaru immobilizer codes. See the Subaru Technical Information System (STIS) (<http://techinfo.subaru.com>) for more information. Instructions for Immobilizer re-initialization for keys, etc., can be found in the applicable Immobilizer Manual on STIS.

TEACHING OPERATION CODES

A Teaching Operation Code may be needed. The following are the necessary Teaching Codes:

VEHICLE LINE	MODEL YEAR	TEACHING CODE
Legacy	2005-2014	3781
Impreza	2005~07	3178
	2008-2011	3781
Forester	2005~08	3178
	2009-2013	3781
Tribeca	2006-2014	3781

KEY CUTTING MACHINERY RECOMMENDATIONS

Subaru of America recommends the use of the Class C Solutions Group “BD Laser Max” key cutting machine for standard edge cut and high security laser cut keys. Consult <http://subaru.service-solutions.com> for key machine purchases.

BD Laser Max

RETAILER CENTRALIZED KEY CUTTING SERVICE

The Subaru of America Parts Department offers a key cutting service for retailers who have not purchased the key cutting machine. The service program details can be found on Subarunet.com, in the Parts Operations area, using the “*Key Request*” link. Forms, details, and costs are found in this area of Subarunet.com.

continued...

Key Cutting Tips For Using a BD Laser Max

Every Subaru vehicle has a key code that can be found on the original key ring tag and on Subarunet. This code is known as an indirect (obfuscated) code. To cut a key, the indirect code must be translated to the direct code which is the actual key cutting depth information.

Behind the scenes there is a database for each key type which converts the indirect key codes into the respective direct depth codes required to cut a key. In the past Subaru provided third party companies with this database so they could program their key cutting machines for indirect code cutting. The indirect key code could be typed into the key machine and the key machine would automatically convert the indirect code into the direct depth code and cut the key.

For security reasons Subaru is no longer providing this database. The keys for newer Subaru models must be cut using the direct method. The direct code cut depth information for a given key must be obtained through Subaru Lock Information Service (SLIS).

The following information will guide you through both indirect and direct depth key cutting methods.

Prior to Using Machine

1. Locate model and model year in the Key Type & Cutting Information chart found on the following pages to find the vehicle specific cutting information
2. Note Cut By, Jaw, Cutter Size and Adapter requirement
3. If the Cut By is listed as Code, obtain the key code for the vehicle through Subaru.net or through the SLIS service (listed as Key No in SLIS)
4. If the Cut By is listed as Depth, obtain the Depth Code through the SLIS service (listed as Key Code in SLIS)

Machine Tips

1. To limit the selection to US market vehicles, from the Main menu go to Cars and change region to North America
2. Maintain up-to-date software. Software releases prior to March 2016 will not cut all of the keys listed in this bulletin. Refer to attached BD Laser Max instructions for updating software and sign up for software update alerts at <https://blueclassc.mscdirect.com/acton/form/1684/0039:d-0001/0/index.htm>
3. When inserting a key blank into the jaw, make sure that the jaw is clear of debris
4. Press down on the blank as you tighten the jaw to ensure that the blank is fully seated

Cutting a Subaru Key

1. From the main menu, select CARS
2. Select Subaru
3. Select Subaru model
4. Select the row with the year range and key type
5. If cut by code, select CODES and input the key code
6. If cut by depth, select DIRECT and input the depth code per the input sequence chart
7. Follow the machine prompts to set up the required cutter size and jaw type
8. Follow the machine prompts to set up the tip stop or adapter (if required). For assistance in setting up the tip stop and adapter refer to following pages for more information
9. If application calls for F/G jaw, either a F or G jaw can be used
10. If an original key is available, check that the image of the key cut matches the original key and proceed with cutting the key

continued...

KEY TYPE & CUTTING INFORMATION *(Legend for charts on Pages 8-11):*

Multiple part numbers = Refer to Electronic Parts Catalog for the correct VIN specific part number

Sub Master = Master Key without remote keyless entry functions

Valet = Door and ignition only. No remote keyless entry functions. Will not unlock glovebox on Forester and Outback, trunk and glovebox on Legacy and 2008-2011 Impreza, and trunk on BRZ

Push-Button Start Emergency = Emergency Key for Keyless Access with Push-Button Start

Pre-cut available = A pre-cut replacement key can be ordered through the TRMI service

Tip Stop Setup for A and C Jaws

A and C jaws use an integrated tip stop that slides into place when required

Tip Stop Integrated Into Jaw

Tip Stop Setup for F/G Jaw

F/G jaws use a magnetic tip stop that is placed into the required grooved track

Magnetic
Tip Stop

Tip Stop In G1 Position

Adapter (AD03) Setup

4IT 4+4 thin type emergency keys require use of the AD03 adapter that is placed into the jaw as shown prior to inserting the key blank

Adapter AD03

BD Laser Max Keyonline Via PC (USB Memory Stick) Update Instruction

USB Memory stick requirements: 2-4 GB flash/thumb drive. Drive must be free of information prior to performing the update.

1. From the main menu select:
 - a. Setup
 - b. Updates
 - c. Keyonline via pc
 - i. Do you want to update the software?
 1. Select "Yes".
 - ii. Please insert the USB memory stick in to the console and press "OK".
 1. The BD Laser Max will then transfer a ".csk" file to the USB memory stick.
 - iii. Once the file transfer is complete the machine will display "Please remove the USB memory stick, download the update from Keyonline website on your personal computer and save it on the USB memory stick"
 1. Select "OK" and remove the USB memory stick from the console.
2. Insert USB memory stick in to desktop/laptop.
3. Visit **<http://bdlaser.mscdirect.com/>**
4. Double click "choose file".
5. Search and select the ".csk" file downloaded from the BD Laser Max and select "open".
6. Click "request update"
 - a. A dialogue box with the message "This action may require some time. Please wait" will appear. Select "OK".
7. The update package will then be created.
 - a. Once the package creation is completed select
 - i. For Windows users: Select "SAVE" and then "SAVE AS" under the drive that is associated with your USB drive.
 - ii. For Chrome users: Select the "Show in folder" option, then pull to transfer the file to the USB drive.
8. Once the download/transfer is complete, safely eject the USB memory stick from the desktop/laptop.
9. Return to the BD Laser Max which displays the message "Please insert the USB memory stick containing the update".
 - a. Insert the USB memory stick and select "OK".
10. The BD Laser Max will then display the message "Do you want to update the software?"
 - a. Select "yes".
 - b. Please note: The update process may take some time.
11. Once the update file transfer is complete the machine will display "Software update successfully installed". Select "OK" then remove the USB memory stick and save for future use.

Form D1

AUTHORIZATION FOR AUTOMOTIVE KEY GENERATION and/or IMMOBILIZER SYSTEM/ANTI-THEFT SERVICES

(The LSID Holder must fill out this form, after personally looking at the photo I.D., the registration and the VIN plate on the Vehicle. These forms are to be kept for 2 years in a secured location as per the NASTF positive I.D. Policy. The NASTF Director of Operations will randomly audit these forms to ensure compliance with positive I.D. policy. Failure to produce D-1 Forms when requested will result in LSID registry suspension and possible termination.)

I hereby certify that I have the authority to order keys and immobilizer system reset services for the vehicle indicated below. I agree that the information I am providing is true and correct. Further, to the maximum extent permitted by applicable law, I agree to indemnify and hold harmless the service provider listed below and related parties providing security information from any and all liability or claims that may arise from the performance of this service. I further agree to indemnify the automaker and their affiliates, successors, assignees, and nominees from any and all claims, losses, or costs (including reasonable attorney's fees) arising from any acts or omissions of the service provider, the service provider's employees, subcontractors, or agents.
