Service Bulletin**

General Information

Key fobs for remote keyless entry on New Cascadia vehicles are delivered in packages that include a unique ID for the fob. See [Fig. 1](#). The ID is required when pairing the key fob with a vehicle.

If the ID is lost, the fob cannot be paired with a vehicle. Therefore, it is strongly recommended that the key fob ID be entered as a global note in PartsPro using the serial number for the vehicle associated with the fob.
