Subject: York ADB Caliper Torque Bypass Process Validation

Dear Customer,

Our records indicate that you are the owner of certain vehicles, and DTNA has decided to share the following documentation with you.

This documentation applies to 2018 Freightliner New Cascadia vehicles.

We hope you find this information helpful.

We will be checking New Cascadia units that went through a manual torqueing procedure at the Meritor York facility to validate their DC tools bypass procedure. This will entail checking steer and drive axle brake caliper fasteners for proper torque.
