

## Vehicle does not start

---

Topic number	LI54.10-P-068625
Version	1
Function group	54.10 Battery, power supply, voltage converter
Date	08-06-2018
Validity	Model 453 (smart electric drive)
Reason for change	New symptom "Veh. does not start" added
Reason for block	

---

### Complaint:

Vehicle does not start and the "Ready" indicator in the instrument cluster does not appear when the ignition key is turned to the start position (3).

### Cause:

If the ignition key is turned to the start position (3) for only a short time, an engine start is not possible and the "Ready" indicator lights up briefly or remains off altogether.

### Remedy:

The ignition key must be held in start position (3) for longer until the "Ready" symbol stays illuminated in the instrument cluster.

A note is being inserted into the owner's manual.

Symptoms
Power generation / Engine management / Engine start/stop / Does not start
Overall vehicle / Power supply / High-voltage on-board electrical system / High-voltage battery / Malfunction
