Product Change Notice - New plastic catch on 07 series baggage doors

Dear Valued Customer:

Please be advised we are making a change to the slam catch on our 07 series bag doors (Fig. 1), which improves product function.

Currently, the catch is metal (Fig. 2), which requires two screws for installation from underneath the door frame (Fig. 2A). The new catch is plastic (Fig. 3) and uses snap-on installation making replacement of the catch easier. The new catch is snapped on over a glue dot for added strength

Along with ease of replacement, the function of the door will be improved. With the new plastic catch, the door will latch itself if the user lets the door fall shut. Currently, the door will only latch if the user pushes it closed.

Besides the self-latching improvement, there are no other changes in function of the door. There are also no changes in installation of the door for the OEM. The price for the catch remains the same.

The part number for the catch will change from 645469 metal to 767855 plastic. The part number for the glue dot is 767856. However, the part number for the door will not change, so there will be no change in order process for the customer. The change will take place on or around Jan. 1, 2019.
