

## **WTW-82 Retailer Inventory on Stop Sale**

TO: Parts Managers/Service Managers/General Managers

FROM: Subaru of America, Inc.

DEPARTMENT: Parts & Service

DATE: 11/08/18

### **Combination Meters for MY18 Outback/Legacy for WTW-82**

Current MY18 Outback & Legacy vehicles on Stop Sale can have the combination meter replaced through the normal United Radio procedures. Due to limited availability, ONLY retailer new vehicle inventory VINs are authorized for repair at this time. United Radio has been provided with a list of VINs for affected retailer new vehicle inventory to validate qualifying orders. Customer and SSLP VINs are NOT eligible for repair at this time.

The Combination Meter order procedures and order form can be found at [Subarunet >> Parts Operations/ Combi Meter Order Request](#).

*NOTE:* If a vehicle owner requests an SSLP because of WTW-82 the Service/Parts Department should follow normal SOA Rental Car Request Form procedure through contact with the PIC Line.
