

REFERENCE NO: RF-18-02R1

DATE: January 8, 2019

SUBJECT: ALL MODELS – CHANGE IN LUG NUT SIZE

As of May 1, 2018, Japan produced vehicles use 17 mm hex lug nuts instead of 21 mm on the same size thread. When installing new lug nuts or the accessory Wheel Lock Set, make sure to use the appropriate part number for the vehicle you are working on.

NOTE: The Mazda3 produced in Mexico is not affected.

Use the GEPC or the Mazda Accessory web site [MXConnect (dealers.mazdausa.com)] to look up the correct part number for the vehicle you are working on.

UPDATE: For Mazda6, CX-5 and CX-9 vehicles, there was a switch from 17 mm to 21 mm lug nuts starting December 3, 2018 with the VINS listed below.

Vehicle	Starting VIN of switch from 17 mm to 21 mm lug nuts on Dec 3, 2018
Mazda6	JM1GL1UM8J1333518
CX-5	JM3KFB EY2K0543197
	JM3KFACM5K1542002
	JM3KFBDM2K0543540
CX-9	JM3TCACY1K0314028

For CX-3 and MX-5, there will be a switch from 17 mm to 21 mm lug nuts around April 2019. Mazda3 will continue to use 17 mm lug nuts.

Lug Nuts

- B002-37-160B (21 mm)
- K123-37-160 (17 mm)

Accessory wheel lock set:

- 000088120DBP (21 mm hex)
- C9N1V9740 (17 mm hex)
