WJ67 Campaign - Re-programming DME and PDK Control Units

Overview

New data records for the DME control unit and the PDK control unit are available for the affected vehicles. The new data records will enhance vehicle drivability and switching comfort of the vehicles.

To implement these improvements in the affected vehicles, the DME and PDK control units must be re-programmed with the updated software.

Model type	Panamera (971)
Model year	2017 - 2018
Manufacturing period	between 09/28/2016 and 03/29/2018
Number	2,314

To download a list of your affected customers for this campaign, please follow the instructions found at <https://ppn.porsche.com/portal/docs/DOC-182765>.

Porsche Mobility

If requested, the mobility of the affected customer can be guaranteed by offering a suitable replacement vehicle or by having the vehicle transported to the relevant Porsche Centre.

Please invoice this additional service with the campaign scope via WWS.

Required software

PIWIS Tester 3 test software version

37.700.020 (or higher)

If other programming campaigns that affect **the same control unit** and involve the **identical procedure** are open for a vehicle in addition to this campaign, the affected control unit must only be **programmed once** using the **current PIWIS Tester test software**.

Please proceed as follows for the campaigns that have not been carried out:

- Mark the campaign as '**cannot be carried out**' with the reason "**Modification of the affected component**" in PQIS. The "**Warranty relevance**" flag must be activated in order to be able to set a warranty claim and close the campaign.
- A warranty claim must be submitted for the campaign in which **0 TU** is entered as the specified **working time** and **no** material items are specified.

Warranty processing

Please enter the campaign that was carried out in the Warranty and Maintenance booklet for the vehicle.

Scope:

Damage code	WJ67 66 000
Repair code	1
Working time	61 TU

If any questions arise, please feel free to contact me directly.
