### Update 3/28/19

The VIN list for USA has been added.

### Update: 03/13/19

TI has been updated with new parts information.

### Update: 02/25/19

Parts are now available and can be requested via a PTEC-PAV.

Technical repair instructions for this campaign can be found below and have been published in PIWIS.

## Overview

The demand for the equipment option "Weissach package" was significantly higher than originally calculated. This resulted in supply bottlenecks for our supplier of the front lids with carbon-weave finish contained in this package.

As a result, vehicles were delivered provisionally with a front lid in vehicle colour and do not therefore match the customer order.

WJ57 Retrofitting Front Lid with Carbon-weave Finish (MY 2019 911 GT3 RS)

The front lids with carbon-weave finish that were ordered are now available for the respective customers and will be fitted on the vehicle upon request.
