SUBJECT: GEAR POSITION SWITCH SERVICE

PURPOSE

This Team Tip is designed to inform dealers about updated information regarding gear position switches for all 2014-2019 Indian Motorcycle (111 c.i.) models. Updated information has been added to the Service Manual to provide dealers with clear direction on how to properly maintain and service gear position switches. We have also updated the maintenance interval chart to include the inspection and cleaning of the gear position switch at 10,000 mile intervals.

AFFECTED MODELS

MODEL YEAR	MODELS
2014-2019	All Indian Motorcycles (111 c.i.)

SERVICE MANUAL INFORMATION

If a motorcycle is exhibiting incorrect gear position or gear position indication problems, refer to the Service Manual for the most up-to-date cleaning / inspection procedures. **Reference the ELECTRICAL chapter > CHASSIS ELECTRICAL** for the updated information to help properly address these concerns:

- Gear Position Switch Replacement
- Shift Drum Spring Inspection

IMPORTANT UPDATES INCLUDE:

- Updated maintenance interval for cleaning / inspection of the gear position switch at 10,000 miles.
- Updated service procedure for gear position switch cleaning / inspection.
- Updated shift drum spring free-height and pin profile to determine wear.
