

Document Information

This document is uncontrolled when printed. Before use, check the Knowledge Base within the McLaren Retailer Portal to verify that this is the current version.

Vehicles affected:

P11: 12C, 12C Spider, 650S Spider, 625C, 625C Spider

P11R: 675LT, 675LT Spider

Location: Chassis - Suspension Fluid System

Concern: PCC Degrade warning message

Condition: During driving with any Handling mode selected. You might notice the suspension reacts the same on N-S-T (e.g. stiff)

Diagnostic Trouble Codes

PCCU:

C11487A APMU System Leak

C114809 APMU System Failed

Measure

1. Check PAS fluid level
2. Visually inspect suspension circuit for external leaks
3. If no external leaks have been identified the above DTC is logged due to a (or more) failed accumulators (internal diaphragm)
4. Replace all 4 suspension accumulators (because the diagnostics does not specify which accumulator has failed)

Care Point: All accumulators can be replaced individually, no need to replace the rear dampers or the APMU module.

Parts Information

12C: 11B0225CP

650S & 625C: 11B1538CP

675LT: 11B1538CP

MTI Updates Information

N/A
