SMI Stop Signal Update Saf-T-Liner C2

SMI Corp has released their new “Defender” Series of composite stop signs for use on the **Saf-T-Liner C2** product line. The new Defender series includes SMI’s next generation drive system with increased motor torque along with improvements to the hinge.

This bulletin for Defender Series replaces all current electric signs that utilize a composite stop blade.

Please be aware that the “Defender” series signs come at a much higher cost than its predecessor.

This change will take effect in Asist beginning on orders committed **9/29/18** and after.

Due to supplier availability of the current stop arm, some orders in our backlog with a start date of early November 2018 and beyond will also need to change to the new “Defender” stop arm, at no increase in cost to the dealer. TBB will handle all processing of the change orders on your behalf. Pricing associated with the stop arms being discontinued will be applied to the new “Defender” series at this time. Please be aware that, in the near future, the price increase for the “Defender” series will take effect. You will be notified by PAB when this change occurs.

Below is a summary of changes that will take effect in RACE for orders committed **9/29/18** and after.

Feature	Description	Action
D500602017	Sign-Stop, Electric Front #T6000-E21 Incandescent	Discontinued.
