Storage Update

HDX

We have revised storage box lamps for through storage on the HDX product line. This will provide balanced lighting and standardization for our production line. The titles for each of the remaining storage box lamp codes will be revised and now match to their corresponding storage box.

Change orders will be processed to bring in-house orders in line with these lamps revisions.

A small chart has been added to help get you familiar with the lighting available for each through luggage option.

<u>Lamp Option</u>	<u>Storage Option</u>	<u>ACTION</u>
