

Axial Caliper Mounting Transition for Air Disc Brakes (FTL189)

April 5, 2018

Effective: Chassis Starts on June 4, 2018

This communication amends a previously issued communication issued on March 6 (FTL187).

The previously issued communication indicated that the new axial-mounted caliper configuration for the Meritor EX-L disc brakes would be implemented on an orders received basis. Please note that the new Meritor EX-L brakes will implement with chassis starts noted above. Truck Change Orders will be issued.

A data code crossover is tabulated below along with updated implementation notes. The Meritor EX-L air disc brakes will become standard on the New Cascadia with the next Price Level.

SpecPro pricing will apply.
