## **Emissions Recall: 2018 Accord Hybrid High-Voltage Battery Software**

Dear FIRSTNAME LASTNAME,

On some 2018 Accord Hybrid vehicles, if an incorrect high voltage (HV) battery is installed the DTC P0A80 (Replace Hybrid Battery Pack) will be set. If the correct HV battery is subsequently installed, the DTC P0A80 cannot be cleared as required and may lead to a failed Inspection and Maintenance test. The new software version eliminates this issue.

### **What should you do?**

Contact any authorized Honda dealer for an appointment to have your vehicle repaired. Honda will update the software in the HEV battery system. The dealer will repair your vehicle free of charge. Please plan to leave your vehicle at the dealer for at least half a day to allow them flexibility in scheduling.

### **California Owners Only**

The DMV will not renew your registration until this emissions recall has been completed. After completing the repair procedure, your dealer must give you a Vehicle Emission Recall - Proof of Correction certificate. Please make sure the dealer completes and gives you the certificate. Keep the certificate for your records as proof that the emissions recall was completed. Submit the certificate to the DMV only if the DMV requests it.

### **Warranty Statement**

In order to ensure your full protection under the emission warranty provisions, it is recommended that you have your vehicle serviced as soon as possible. Failure to do so could be determined as lack of proper maintenance of your vehicle.

### **Check Your Vehicle for Open Recalls**

To check your vehicle's eligibility for repair under this or any other recall, please access the Honda Recall Lookup tool at [www.recalls.honda.com](http://www.recalls.honda.com) and enter your Vehicle Identification Number (VIN).
