2017-2019 ROGUE, ROGUE HYBRID AND ROGUE SPORT; CHASSIS CONTROL UNIT AND ADAS CONTROL UNIT 2 IDENTIFICATION

APPLIED VEHICLES: 2017-2019 Rogue (T32)
2017-2019 Rogue Hybrid (T32H)
2017-2019 Rogue Sport (J11)

SERVICE INFORMATION

The CONTROLLER ASSY-IDM (Chassis Control Unit) and the CONTROLLER ASSY-WARNING SPEAKER (ADAS Control Unit 2) may be incorrectly identified while diagnosing for related issues.

The Chassis Control Unit and the ADAS Control Unit 2:

- Cases, externally, appear identical.
- Are located behind the glove box, in the same area.
- Harness connectors are the same, and can be connected to the wrong component.

NOTE: See Figure 1 for the correct locations of the Chassis Control Unit and the ADAS Control Unit 2.

- Can be identified by their location (shown in Figure 1) and confirmed by the part number on the control unit's label.

Nissan Bulletins are intended for use by qualified technicians, not 'do-it-yourselfers'. Qualified technicians are properly trained individuals who have the equipment, tools, safety instruction, and know-how to do a job properly and safely. NOTE: If you believe that a described condition may apply to a particular vehicle, DO NOT assume that it does. See your Nissan dealer to determine if this applies to your vehicle.

Control Unit Locations
