March 5, 2019 Version 1

2016-18 Civic 1.5L: Software Update with A/C Control Unit Replacement; DTC P0300, P0301, P0302, P0303, P0304, or P0172

#### **AFFECTED VEHICLES**

| Year    | Model | Trim                 | VIN Range                |
|---------|-------|----------------------|--------------------------|
| 2016-18 | Civic | ALL with 1.5L Engine | ALL - With DPSM Approval |

#### **BACKGROUND**

Under certain circumstances, the vehicle may experience driveability issues, which may result in DTCs P0300 (random misfire detected), P0301 (No. 1 cylinder misfire detected), P0302 (No. 2 cylinder misfire detected), P0303 (No. 3 cylinder misfire detected), P0304 (No. 4 cylinder misfire detected), or P0172 (fuel system too rich) to set.

## NOTE

Repair an affected vehicle using this service bulletin only if the vehicle otherwise would be covered by S/B 18-137, *Product Update: 2016-18 Civic: Software and A/C Control Unit Update, DTC P0300, P0301, P0302, P0303, P0304, or P0172* and the repairing dealership is located outside of the following cold-weather states: Alaska, Connecticut, Iowa, Illinois, Indiana, Massachusetts, Maine, Michigan, Minnesota, Montana, North Dakota, Nebraska, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, South Dakota, Vermont, Wisconsin.

#### **CORRECTIVE ACTION**

Reset the maintenance minder, replace only the engine oil without replacing the oil filter, and replace the A/C control unit. Clear any DTC's and update the PGM-FI and TCM software with the latest version. Reset the throttle position learned values and do the PCM idle learn procedure.

**CUSTOMER INFORMATION:** The information in this bulletin is intended for use only by skilled technicians who have the proper tools, equipment, and training to correctly and safely maintain your vehicle. These procedures should not be attempted by "do-it-yourselfers," and you should not assume this bulletin applies to your vehicle, or that your vehicle has the condition described. To determine whether this information applies, contact an authorized Honda automobile dealer.

## **WARRANTY CLAIM INFORMATION**

**DPSM** Authorization is required prior to beginning repairs.

Use this warranty information if your dealership participates in the bulk oil program.

| Operation<br>Number | Description   | Flat Rate<br>Time | Defect<br>Code | Symptom Code | Template<br>ID | Failed Part Number |

## **SOFTWARE INFORMATION**

# NOTE

Unnecessary or incorrect repairs resulting from a failure to update the i-HDS are not covered under warranty.

i-HDS Software Version: 1.004.064 or later

J2534 Software Information:

- PC Application Version 1.1.0.6 or later
- Database update 27-DEC-2018 or later

Before beginning the repair, make sure that both the i-HDS and J2534 software are updated as listed above. Do only the update listed in this service bulletin.

To update the software, you must use the MVCI or the DST-i interface in conjunction with the J2534 Rewrite PC application on the i-HDS.

For more information about updating the i-HDS, the MVCI, and vehicle systems, refer to service bulletin 01-023, *Updating Control Units/Modules*.

### REPAIR PROCEDURE

- 1. Reset maintenance minder main code A. Refer to the service information.
- 2. Drain and refill the engine oil. Do not replace the oil filter. (3.4 guarts)
- Connect the i-HDS and click on the Body Electrical. From there, select HVAC and open Data List/Snapshot to check if the A/C control unit has been replaced. One of three options will appear; Not Complete, Completed, or Not Applicable.
  - If it reads Completed or Not Applicable, skip to step 5.
  - If it reads Not Complete, go to step 4.
- Replace the climate control unit.
  - 4.1. Remove the climate control unit and replace with the new unit. See service information for additional instructions.
  - 4.2. Install all parts in reverse order.
  - 4.3. Run the self-diagnostics procedure with the i-HDS to make sure there are no problems in the system.
- 5. With the i-HDS, check to see if the PGM-FI and TCM software has been updated by using the J2534 rewrite application.
  - If they are up to date, the procedure is complete.
  - If not, go to step 6.
- 6. Update the PGM-FI and TCM software using the i-HDS J2534 rewrite software with the MVCI or DST-i. Refer to Service Bulletin 01-023, *Updating Control Units/Modules*.

# NOTES

- Connect a fully charged jumper battery and leave it connected during the entire procedure to maintain steady voltage.
- Never turn the ignition to OFF or ACCESSORY during the update. If there is a problem with the update, leave the ignition turned to ON.
- To prevent control unit damage, do not operate anything electrical (headlights, audio system, brakes, A/C power windows, door locks, etc.) during the update.
- Do not use the MongoosePro VCI tool.

7. Reset the throttle position learned values by referencing the throttle body removal and installation in the service information, then do the PCM idle learn procedure. Refer to service information for additional instructions.

# NOTE

For more information on the PCM idle learn procedure, see the *Tech2Tech®* video, "A Look at PCM Idle Learn".
