**Freightliner  
Service Bulletin**

**Description of Revisions:** *This bulletin replaces the version dated October 2014. The hyperlink for natural gas vehicle information is updated.*

## General Information

Customer demand for natural gas vehicles is growing, and Freightliner is responding to that demand by offering an increasing number of natural gas products. While very similar to traditional (diesel-powered) vehicles, natural gas products have a number of unique service and operational requirements.

In response to feedback from service providers in the dealer network and fleet maintenance managers, we have established a new resource on DTNAConnect® where a variety of materials can be accessed from one convenient location. Use the "Natural Gas Vehicle Information" link located under "DTNAConnect Resources," shown in **Fig. 1**, on DTNAConnect, or go directly to <https://dtnacontent-dtna.prd.freightliner.com/content/dtna-connect/natural-gas/natural-gas.html>.
