 CAUTION

During diagnosis, a diagnostic trouble code associated with another system may be stored when the ignition switch is turned on with connector(s) disconnected. After completing the repair, confirm all systems for diagnostic trouble code(s). If diagnostic trouble code(s) are stored, erase them all.

Inspect according to the inspection chart that is appropriate for the DTC.

 CAUTION

During diagnosis, a diagnostic trouble code (DTC) associated with another system may be set when the ignition switch is turned "ON" position with connector(s) disconnected. After completing the repair, confirm all systems for diagnostic trouble code(s). If diagnostic trouble code(s) are set, erase them all.

Inspect according to the inspection chart that is appropriate for the DTC.

CHECK CHART FOR DIAGNOSTIC TROUBLE CODES

M1524003303129

⚠ CAUTION

During diagnosis, a diagnostic trouble code (DTC) associated with another system may be set when the ignition switch is turned "ON" position with connector(s) disconnected. After completing the repair, confirm all systems for diagnostic trouble code(s). If diagnostic trouble code(s) are set, erase them all.

Inspect according to the inspection chart that is appropriate for the DTC.

CHECK CHART FOR DIAGNOSTIC TROUBLE CODES

M1524003303129

⚠ CAUTION

During diagnosis, a diagnostic trouble code (DTC) associated with another system may be set when the ignition switch is turned "ON" position with connector(s) disconnected. After completing the repair, confirm all systems for diagnostic trouble code(s). If diagnostic trouble code(s) are set, erase them all.

Inspect according to the inspection chart that is appropriate for the DTC.
