

Service Information

Offboard Diagnostic Information System Service (ODIS Service)

Number: AOS-19-01

Subject: ODIS Service - Enhancements

Date: Feb. 28, 2019

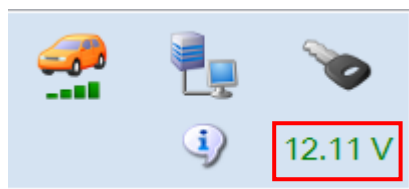

1.0 – Introduction

With the upcoming release of ODIS Service Application Version 5.1.3, there will be a new look and functionality to the ODIS Home screen.

2.0 – Voltage Indicator

When the VAS 6154 diagnostic interface is connected to a vehicle, the battery voltage will be displayed in the top portion of the vehicle status window.

Note: The VAS 5054A will NOT display voltage.

3.0 – Starting Vehicle Diagnostic

The new home screen will allow you to enter your accessaudi.com username and password at the beginning of vehicle diagnostics. Once you enter these credentials, you will click Starting diagnosis to begin. If you do not have credentials, you may skip the log in and click Starting diagnosis to begin.
