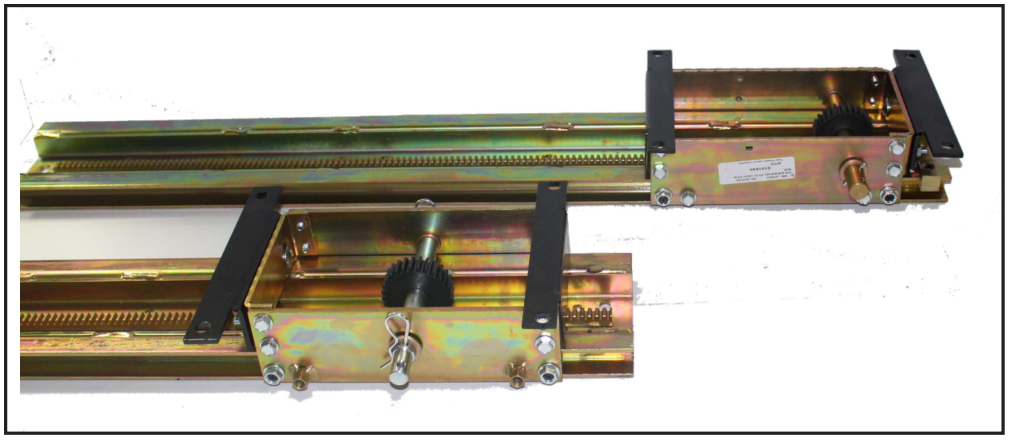
Product Change Notice - Above-floor slide-out side plates

Dear Valued Customer:

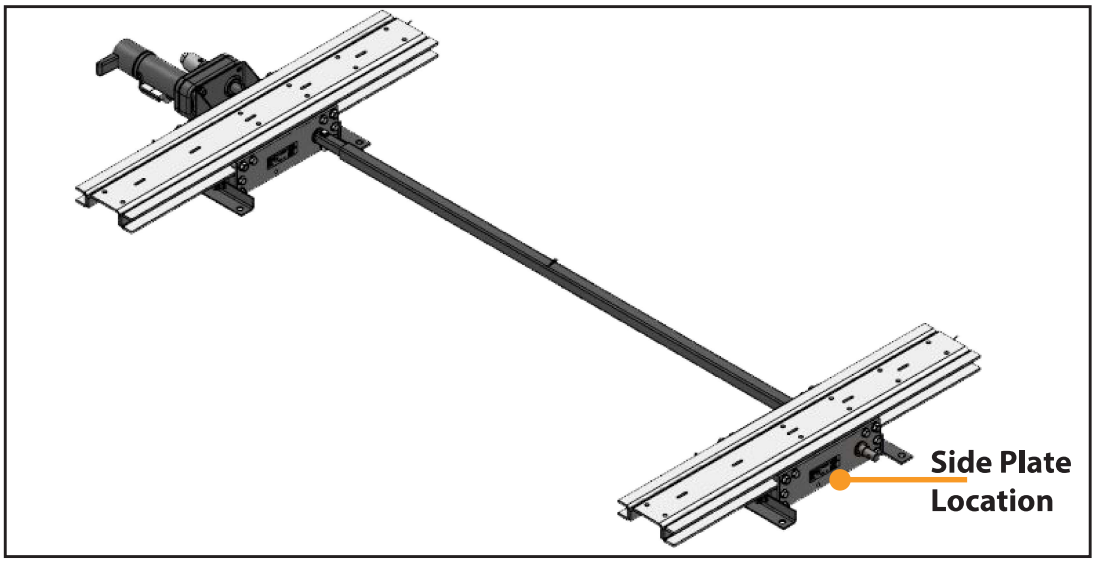
Please be advised we are changing the side plates on all of our motorized above-floor slide-out systems from the original welded side plate to the new bolt-on side plate.

Most of our above-floor systems are already using the bolt-on plate. The change is being made to standardize the product line and streamline manufacturing. There is no change in quality, fit form or function with the change to all bolt-on plates. There is also no price change.

The top-level part number will not change for the slide-out systems. The slide-out systems affected by the change are 367208, 367226, 367231, 367232 and 367242. The change will take place on or around April 1.



Top: New bolt-on side plate. Bottom, original weld-on side plate. The weld-on side plate will be obsoleted.



Example of side plate location on a slide-out system.

If you have any questions, please feel free to call me directly or your LCI representative. We value and appreciate your business and partnership.

Sincerely,

Brian Hess
