High Pitch Electronic Noise From HVAC System

Range Rover 18 - 19MY
RR Sport 18 - 19MY

Customer Voice:

- Customers may report a high pitch electronic type noise is emanating from the HVAC center vents.

Technical Description:

- The hose between the air ionization unit and the HVAC center vent duct does not sufficiently dampen the 9kHz noise produced by the air ionizing unit fan.

Status:

- A new sound absorbing hose for the ionizing module has been created to address this concern.
- TSB LTB01283 will be published once adequate stock of the new hose is available, target timing early March release.
