Subject: Steering Wheel Air Bag Options

Dear Customer,

Our records indicate that you have ordered a model year 2020 Freightliner New Cascadia with a steering wheel air bag.

DTNA has initiated a recall, identified as Recall FL806, on these vehicles.. A copy of the recall notice is available on DTNA Connect. Recall FL806 replaces Recall FL800, which is no longer in effect.

Unfortunately, as a result of the recall, DTNA can no longer provide you with a model year 2020 Freightliner New Cascadia with an air bag. We have several options available for you.

- (1) You may wait until the recall fix is available before receiving the truck. A date for a final fix is still to be determined.
- (2) You may have the vehicle converted to one pre-wired for an airbag and when the recall issue is resolved, at your request, we will install an air bag at no cost to you. For vehicles without Rolltek, TCO module changes from 725-001 to 725-021. For vehicles with Rolltek, TCO module 725 changes from 725-012 to 725-022.
- (3) You may have the order switched to a vehicle without an air bag and we will provide the vehicle to you as soon as possible. In this case, the TCO module dc 725-001 or 725-012 will be deleted by a TCO to 725-998.

We hope you find this information helpful and apologize that we have experienced this issue.
