

## RES Freezes with CabinWatch™ Error Message

### AFFECTED VEHICLES

Year	Model	Trim
2018-19	Odyssey	Touring and Elite

We're currently investigating an issue that when using CabinWatch™ and the RES is streaming an application or playing a DVD for **10 minutes** or more, a **Camera System Problem. Image cannot be displayed.** message appears on the Display Audio screen. At the same time, the overhead screen freezes, but the audio keeps playing.

So far, we know it's software related, so don't replace any components. When we come up with a fix, we'll release an OTA software update.
