Smart Climate Passenger Seat Detection	19MY I-PACE
<p>Customer Voice:</p> <ul style="list-style-type: none">- Smart Climate seat occupancy display does not change status of front passenger seat <p>Technical Description:</p> <ul style="list-style-type: none">- Smart Climate seat occupancy display does not change status of front passenger seat. Air flow operates as expected <p>Status:</p> <ul style="list-style-type: none">- Currently working with UK Engineering to make the changes needed for proper display operation.- Air flow operates as expected	 <p>The image shows a close-up of the SMART CLIMATE control panel. It features a green power button on the left and two seat icons on the right. The top seat icon is highlighted in white and has three wavy lines above it, indicating that the air flow is active for that seat. The bottom seat icon is grey and has no wavy lines, indicating that the air flow is not active for that seat.</p>
