<ul style="list-style-type: none"> Service Campaign T3C TSB #19-01-010H Update 	04/24/19

*****IMPORTANT Dealer Stock and Retail Vehicles*****

Dealers must perform this campaign on all affected vehicles prior to customer retail delivery and whenever an affected vehicle is in the shop for any maintenance or repair. When a vehicle arrives at the service department, access Hyundai Motor America's "warranty vehicle information" screen via WEBDCS to identify open campaigns

Affected Vehicles

Hyundai has launched a Service Campaign to inspect and repair or replace the vacuum pump cap on certain Tucson (TL) vehicles.

The affected vehicles include:

- Certain 16-17 MY Tucson (TL) vehicles with 1.6L Turbo Engines

Hyundai is initiating this action to ensure the quality of its vehicles and the continued satisfaction of Hyundai customers.

Description

Some subject vehicles may experience the illumination of various warning lamps including the brake warning lamp and other lamps. This service campaign describes the procedure to repair or replace the vacuum pump, based on vehicle inspection.

Service Action

Reservation – Always check the Vehicle Information Screen in WebDCS for open campaigns and recalls, and advise the customer on time requirements.

Readiness – Review this announcement and the accompanying FAQs with all Service and Parts staff including Reservationist/BDC. Also, complete all applicable training, check your reservation capacity settings (you can set separate capacities for every recall/campaign), confirm email addresses for campaign appointments, and that you have all necessary tools, campaign parts and shop equipment as needed.

- Be prepared to put customers in an SRC or alternative transportation if replacement parts are not available

Reception – Always check the Vehicle Information Screen in WebDCS for open campaigns and recalls, and print a copy for technicians. Provide SRC or an alternative vehicle, as needed. If a customer has declined the campaign, note this on the repair order and request the customer's signature next to the statement.

Repair – Always plug in the GDS before starting the repair. Make sure to complete an MPI on all vehicles and Quality Control your work.

- Check the vehicles dashboard for any warning lights.
 - If any warning lights are present, the vacuum pump cap will be replaced. If no warning lights are present, sealant will be applied to the vacuum pump.
- Check for DTCs and perform the appropriate diagnostic service after repair is performed.

Return – Review all completed campaign and repairs to answer any customer questions. Also, schedule the customer's next service.

Reconnect – Follow up for customer satisfaction.

Parts

Please see TSB #19-01-010H for parts details.

Customer Notification

- None

Thank you for your prompt attention to this important matter and continued commitment to Hyundai customers.
