

Service Information

Offboard Diagnostic Information System Service (ODIS Service) Number: AOS-19-02

Subject: Application Update and Enhancements

Date: Mar. 7, 2019

The following ODIS Service software versions are available for download.

Current ODIS Service Software Versions	
Application: V5.1.3	Diagnostic Content: V2.16.13

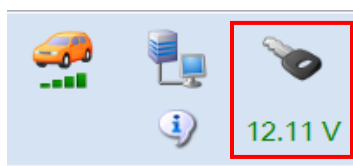

1.0 – Introduction

ODIS Service 5.1.3 has been released and is now available for download. There have been changes and enhancements made to the ODIS home screen.

2.0 – Voltage Indicator

When the VAS 6154 diagnostic interface is connected to a vehicle, the battery voltage is displayed in the top portion of the vehicle status window.

Note: The VAS 5054A will NOT display voltage.

1.0 3.0 – Starting Vehicle Diagnostics

The new home screen will allow you to enter your accessaudi.com username and password at the beginning of vehicle diagnostics. Once you enter these credentials, you will click Starting diagnosis to begin. If you do not have credentials, you may skip the log in and click Starting diagnosis to begin. **Note:** Your diagnostic interface must be connected to a vehicle to start diagnosis.
