With Advanced Park Assist (APA) (RPO UFQ)

Supersession Statement

This PI was superseded to update Model Years and Recommendation/Instructions. Please discard PIC6063B.

Condition / Concern

A customer may comment that their park assist warning goes off with nothing around the vehicle. It may be found that the DIC will display the park assist warning indicator along with a chime or haptic seat activation with objects that are out of the normal range of the park assist sensors.

Recommendations / Instructions

Important: Do NOT replace any parts or attempt to repair this condition.

After a thorough Engineering review, it has been determined that this is a normal operating characteristic.

NOTE: The customer can turn the Park Assist System off if they would like to avoid unwanted warnings and turn on the system when they wish to use the Advanced Park Assist feature.

Customer Information

Please communicate to the customer this condition is a normal operating characteristic of their vehicle. It will not impact the designed performance or reliability of the vehicle. Please share this information with the customer, including a copy of this message.
