Supersession Statement

This PI was superseded to update Model Years. Please discard PIC6169D.

The following diagnosis might be helpful if the vehicle exhibits the symptom(s) described in this PI.

Condition / Concern

A customer may comment on one or more of the following.

- **SES light on dim when the vehicle is running**
- **SES light on dim when the vehicle is put into gear**
- **SES light on dim when locking or unlocking the doors**
- **Service Front View Camera Module Message on in the DIC**
- **Rear View Camera display issues**
- **Radio display blanking out at times (IO5, IO6 radios)**
- **Other various electrical concerns**
- **Service Transmission Message on in the DIC**
- **Service Stabilitrak Message on in the DIC**

When checking the vehicle for codes, DTCs may or may not be found.

Note: All DTCs, including U-type DTCs, need to be addressed prior to diagnosing a P175F in the K71 Transmission Control Module, seeing mostly in vehicle's equipped with the AF50 transmission assembly, but not limited to. DTC P175F usually sets as a default when other DTCs are set in other modules.

Recommendations / Instructions

Inspect connectors X210 and X220 for bent terminals or connection issues.

Repair as required.

Warranty Information

For wiring repairs covered under warranty, please refer to latest version of bulletin [10-00-89-005](#) for warranty information on wire/connector repairs.

Please follow this diagnostic or repair process thoroughly and complete each step. If the condition exhibited is resolved without completing every step, the remaining steps do not need to be performed.
