

## Federal Recall Information

---

**19PBB**

### Supplier

Peterbilt

---

### Description

Model 520 Cab Power Distribution Center (PDC) Harnesses with Inadequate Gauge Wire

---

### Release Date

5/31/2019

---

### Introduction

Peterbilt Motors Company has determined that a defect, which relates to motor vehicle safety, exists in certain model year 2017, 2018, 2019 and 2020 Model 520 vehicles manufactured between October 17, 2016 and March 04, 2019 with left hand or right hand single steer Power Distribution Center (PDC) harnesses. The power wire to the PDC may be inadequate and unable to accommodate the current draw. This can cause the wire to overheat and potentially melt the cab power harness connector.

This could cause a loss of power to the cab and engine, which may result in the engine shutting down. A sudden loss of engine power could increase the risk of a crash.

---

### Resolution

This bulletin will be updated as soon as parts and repair procedure become available.

---

**It is a violation of Federal law for a dealer to sell or lease new vehicles covered by this recall until the defect or noncompliance has been corrected.**

---

### Parts

Parts are currently not available.
