

FIELD SERVICE BULLETIN***FS-2019-03: Battery Fuse Change***

Date: May 29, 2019
Model: Hybrid
Model Years: 2013 - 2015

After a review of the fuse selection in some of your 2013 through 2015 Hybrid buses, Gillig determined that the fuses in the battery fuse box need to be changed.

Gillig is sending you the correct fuses needed. They are:

51-19322-080 – 80 Amp Fuse – 1 each

51-19322-040 – 40 Amp Fuse – 1 each

In addition, we will be sending you a replacement decal for the door on this box to match the correct fuses.

59-74282-001

You should remove the 125 Amp Fuse for the 12 Volt to/from the Equalizer and replace it with the 80 Amp Fuse.

Remove the 60 Amp Fuse for the 24 Volt to/from the Equalizer and replace it with the 40 Amp fuse.

Approved:

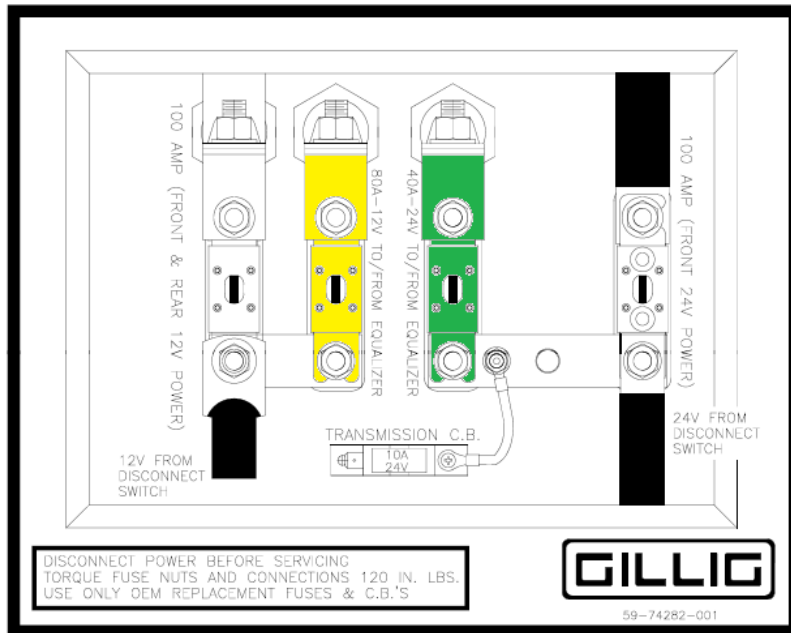

Robert L. Birdwell, Executive Director
Quality Control & Field Service
