Product Update: Motor Companion Flange Upgrade 00029C

Dear: Odyne Hybrid System Fleet Owner

This letter is to notify you of a potential problem with your hybrid vehicle and what you should do to resolve it.

What is the problem?
Potentially loose Traction Motor Companion Flange bolts / Lovejoy set screws causes vibration which may result in damage to the Traction Motor. This update applies to Odyne hybrid systems, specifically for the following VIN(s).

1HTMMAANXFH122187

What should you do?
Contact your Odyne authorized Allison service provider to schedule an appointment. (Note that not all Allison service providers are authorized to work on Odyne hybrid vehicles.) The provider will need to order parts in advance of your appointment. Please plan to leave your vehicle at the provider for half a day for the repair.

What action will be taken by your service provider?
To correct the problem, your service provider will Remove Driveline from Traction Motor and install updated companion flange and ¼" hardened washer on bolt for Traction Motor Companion Flange(s).There is no cost to you for this product update.

What should you do if you feel you have received this notice in error?
Our records show that you are the current owner or lessee of the hybrid vehicle involved in this product update. If this is not the case, or the name / contact information is not correct, please advise Odyne of the error at ServiceSupport@Odyne.com.

We apologize for any inconvenience this product update may cause you. Our goal is to ensure your satisfaction with your Odyne hybrid vehicle.

Sincerely,
Odyne Service Support

W237 N2878 Woodgate Road Suite 2 Pewaukee, WI 53072
