

** SOLUTION **

Title	Engine Preheat Icon Does Not Illuminate In The Instrument Cluster (IC) During Engine
	Pre-heat (Intake Air Heater) Operation - Post-Facelift Vehicles, Model Year 2018 And
	Newer
Mack Models	
Mack Model	AN - Anthem, CHU - Pinnacle, Axle back, CXU - Pinnacle, Axle front, GR - Granite
	, GU - Granite, PI - Pinnacle
Volvo Models	
Volvo Model	VNL, VNM, VNR, VNX, VAH, VHD
Engine family	
Engine family	11L Engine, 13L Engine, MP7, MP8
** SOLUTION **	
Cause	In post-facelift trucks the Preheat Icon may not illuminate during engine
	preheat operation, providing no indication to the driver that the function is active.
	The icon may not illuminate due to a parameter missing from the Instrument Cluster (IC)
	module.
Solution	If the Preheat Icon does not illuminate while Engine Preheat is active as shown
	below:

A. Update Instrument Cluster Software (SW) to enable the parameter.

1. In Premium Tech Tool (PTT), run Operation 1700-22-03-06 Accessory Kit. The operation can be found under the Program tab.

2. When prompted, enter Accessory Kit Number 85153771.

3. Press the Program button in the lower right-hand corner of the screen.

4. Allow the programming operation to complete.

B. Set Vehicle (System) Date And Time.

1. Run PTT Operation 1700-22-03-02 System Date and Time. The operation can be found under the Program tab.

2. More information can be found in CBR Solution <u>K11533602</u>.

Solution visibility	Dealer distribution
Function(s)/compone	nt(s) affected
Function affected	18 1 0 IC, MID 140 – IC04 / IC05, Intake pre-heater
Function Group	
Function Group	381 combined instrument
Customer effect	
Main customer effect	calibration/programming/pairing/missing operation, visual appearance
Visual appearance	part lost/missing function
Conditions	
Vehicle operating mode	when activating
Frequency of occurrence of problem	always
Engine temperature	cold
Administration
