

SSM 48042 - 2018-2019 F-150/Expedition/Navigator - Adaptive Cruise Control - Cruise Control Inoperative With No DTCs

Some 2018-2019 F-150, Expedition, and Navigator vehicles may exhibit a concern of inoperative adaptive cruise control with no associated diagnostic trouble code (DTC). This concern may occur if the hot in run or start switched power is not present at the anti-lock brake system (ABS) module on circuit CBB17. A load test is recommended to test the ABS module power and ground circuits.
