Porsche Special Tools & Equipment is ready to release the Coolant Cart mentioned in the Tool Index release a few months ago. The reason for the Coolant Cart is to move Special Tools out of the current Special Tool Cabinets to make space for new incoming tools. In this change, we realized the need for the coolant tools to be housed in the same place. This will make it easier for dealer technicians to handle all coolant tools with all coolant related job activities at the same time. This should cut down the time spent searching and organizing tools needed for Porsche vehicles. This also should help the dealer technicians keep everything clean and professional in the shop area. Please expect the Coolant Cart to start auto-shipping to your dealer CW26/19 June 24, 2019. Each dealer will receive one cart, with foam already installed. Please place all tools that we have asked the dealers to hold aside and future released coolant tools in the appropriate area provided in the foam cut-outs. We have included a foam cut-out map for your convenience electronically in this post. If your dealer is a larger store and you feel the need to order more carts. Please feel free to reach out to Jeff Haller at [askthetoolguy@porsche.us](mailto:askthetoolguy@porsche.us) to order.
