Please follow procedure below regarding your solar panel.

1. Check the 20 amp fuse on the driver side the pop up tent needs to up, on bed upper right hand side inside white circular plastic cap.

2. Check the wires that go to the Go Power: check the lengths of the wire using the guide jig on the back of the Go Power (picture 1&2 below)

3. Check the 30 Amp Fuse by the lithium battery (with green wire labeled "solar panel" FUSE)

4. Check the connection on the black plastic "ENTRY PLATE" above the solar panel on the roof. Check if wires are zip tied very tight this can cause power issue.

5. Could be a bad Go-power controller

6. Could be a bad solar panel

7. If issue persist contact GoPower 866 247 6527 / Carmanah 250 380 0052 for guidance and for warranty part then take to dealer for the repair.
