

Subject		Market	
Steering Wheel Vibration		USA	
Service Category		Section	
Suspension		Tire/Wheel	
Applicability			
2019 MY 4Runner			

APPLICABLE VEHICLES

2019	4Runner
------	---------

CONDITION

Steering wheel vibration and/or shimmy while driving at 62 mph or above.

- This is for vehicles with less than 5,000 miles and OE wheels and tires.
- Vehicles must have P265/70R17 Dunlop tires.
- No previous repair for same concern or tire rotations.

RECOMMENDATIONS

- After vibration is confirmed, **do not remove** wheels and tires
- Confirm alignment:
 - If out of spec, print reading, repair and recheck vehicle for vibration
 - If in spec, print reading, proceed with below
- Do not attempt any repairs (balance, check RFV, etc.)
- Create a TAS case, attach alignment readings and call TAS for further instruction
- Open to vehicles located in the following regions: Boston, CATD, Cincinnati, New York and SET Regions

If it is a weekend or holiday, continue with diagnosis and repair, save all parts and details (including pictures), and contact TAS at the next available opportunity.

Note: confirm if vehicle had any repair attempts for the same issue, if so, vehicle is not eligible
