

2020 VW Maintenance Schedule – e-Golf

MY 2020 Maintenance Intervals - USA

The intervals shown in this table are based on vehicles operating under normal conditions. In case of severe conditions, such as extremely low temperatures, excessive dust, etc., it is necessary for certain operations to be carried out in between the given intervals. This applies particularly to the cleaning or replacing of the air cleaner filter element.

Service intervals in miles												
	10K	20K	30K	40K	50K	60K	70K	80K	90K	100K	110K	120K
Minor Maintenance ¹⁾	X		X		X		X		X		X	
Standard Maintenance ²⁾		X		X		X		X		X		X
Extended Maintenance				X				X				X
Additional Maintenance Items	Refer to the Additional Maintenance Items Table below											

¹⁾ First minor maintenance service at 10,000 miles or 1 year after delivery, whichever occurs first. Minor maintenance services thereafter occur at intervals of 20,000 miles or every 2 years after the last minor maintenance service, whichever occurs first.

²⁾ First standard maintenance service at 20,000 miles or 2 years after delivery, whichever occurs first. Standard maintenance services thereafter occur at intervals of 20,000 miles or every 2 years after the last standard maintenance service, whichever occurs first.

Check all completed items

Minor Maintenance

- Brake pads (front and rear): Check thickness and brake disc condition. Look for contact pattern and corrosion of brake discs
- High-voltage battery: Check charge level and charge as necessary
- High-voltage warning label: Check that they are present
- Service interval display: Reset

Standard Maintenance (Includes All Minor Maintenance Items)

- 12-Volt battery: Perform diagnosis (determine charge capacity with diagnostic tester)
- Brake fluid: Check level
- Brake Pads (Front and Rear): Check thickness and brake disc condition. Look for contact pattern and corrosion of brake discs
- Brake System and Shock Absorbers: Check for leaks and damage
- Cooling System - Check level and freeze protection
- Exterior lighting: Check function of front and rear lights, headlights (adjust if necessary), automatic headlights (if equipped), turn signals, cornering lights, and hazard warning lights
- High-voltage battery: Check charge level and charge as necessary
- High-voltage charging cable: Check presence and condition
- High-voltage charging socket in charging door: Check for contamination and damage
- High-voltage components: Check for damage and correct routing of the high-voltage components and lines, battery box, high-voltage connections and coolant connections, labels in the engine compartment and rear area
- High-voltage warning label: Check that they are present
- Horn: Check function
- Motor and Motor compartment components (from above): Check for leaks and damage
- Motor and Motor compartment components (from below): Check related components including transmission, final drive, and drive axle boots for leaks and damage
- Service interval display: Reset
- Test Drive: Check braking, steering, electrical, heating/ventilation systems, air conditioning, handling, and parking brake

Standard Maintenance (continued)

- Tire Pressure Monitoring System: Calibrate to correct tire pressure settings
- Tire pressure: Check LF _____ RF _____ LR _____ RR _____ Spare _____
- Tire Repair Kit: Check for damage and prior use
- Tires: Check condition and wear pattern. Record tread depth
- Windshield Wiper/Washer System: Check function and adjust spray nozzle if necessary, fluid level, and freeze protection
- Wiper Blades: Bring into service position, check for damage, and check park position

Extended Maintenance

- Perform Standard Maintenance items
- Body Interior and Exterior: Check for corrosion
- Coil springs and rubber buffer: Inspect for damage
- Interior Lighting: Check function of glove box lights, cigarette lighter/power outlets, luggage compartment, and all warning lights
- Suspension and Steering: Check ball joints, wheel bearings, drive axles, coupling rods, tie rod ends, and stabilizer bar rubber bushings for damage and excessive play
- Underbody: Check underbody protection, underbody trim panels, wire routing, and plugs for damage
- Windshield: Check for damage

Additional Maintenance Items	
<input type="checkbox"/> Brake fluid: Change	3 years after registration and then every 2 years regardless of mileage
<input type="checkbox"/> Dust and pollen filter: Replace	Every 40k miles or 2 years, whichever occurs first
