UTILITY TRAILER MANUFACTURING CO.

## SB-07-014A

Released: August 16, 2019

Updated: August 30, 2019

### **PINTLE HOOK ASSEMBLIES | RETROFITTING TO REEFER MODEL TRAILERS**

When Utility Trailer Manufacturing produces a pintle hook equipped refrigerated trailer on a slider suspension, the upper support of the pintle hook assembly is fabricated with 2 toes up channels welded to a plate as structural assembly.

If a pintle hook is to be retrofitted in the field, make certain that the retrofit includes the following structural preparation:

- (2) toes up channels
- Top plate cross beam structural assembly
- Verticals and reinforcing

For any further questions, the Field Service Department can be contacted at 1(800) 423-6591.
