Engine Cooling Fan Operates at High Speed

18-19 MY Discovery Sport, RR Evoque, E PACE, F PACE, F TYPE, XE, XF with AJ20P4

Customer Voice:

- The engine fan is making a lot of noise.
- The engine fan runs after I turn the car off.

Technical Description:

- DTC P26CB-72 and/or P2B61-73 are stored in the PCM.

Status:

- Perform diagnostic steps outlined in the TOPIx workshop manual 100-00: General Information > Description and Operation > Diagnostic Trouble Code Index INGENIUM I4 2.0L Petrol, DTC: Powertrain Control Module.
- If diagnosis leads to replacement of the coolant pump, check the WERS number on the housing of the pump. If the last two characters are AD or higher, raise an EPQR including contact information of someone who can support PRR at the retailer.
