

Subject

**Parasitic Draw - Dead Battery**

Market

**USA**

Service Category

**Power Source/Network**

Section

**Battery/Charging**

Applicability

**2018 C-HR**

**APPLICABLE VEHICLES**

2018

C-HR

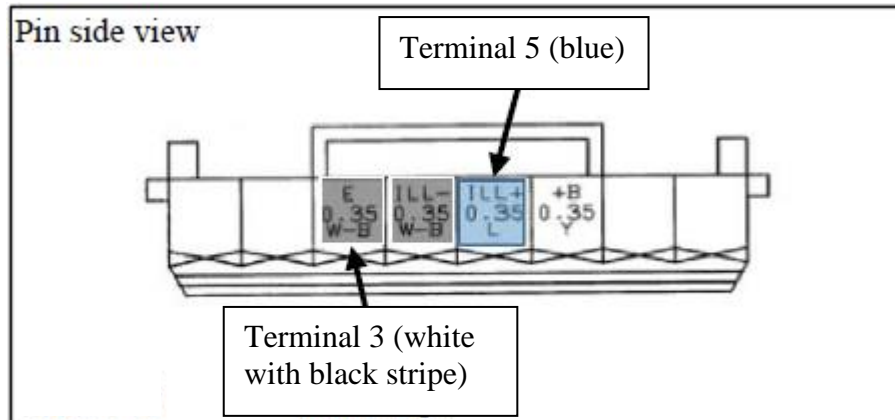

**CONDITION**

Vehicle with accessory installed fog lamps experiences low battery charge causing a hard or no start condition. A parasitic draw is observed between approximately 97 to 600 milliamps. Note: Parasitic draw should be less than 50 milliamps (0.050 amp). Testing may take anywhere from 10 minutes to 2 hours dependent upon which vehicle is being serviced and what equipment is installed in the vehicle.

**RECOMMENDATIONS**

Inspect fog lamp switch for proper installation.

On connector F6 (Auto High Beam Switch) confirm the Scotchloks, used to install the fog lamp switch, are installed on terminals 3 and 5.
