

Technical Service Bulletin

87 Footwell air temperature is too cold

87 19 98 2056274/1 October 4, 2019.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
A8	2019	All	Not Applicable

Condition

Customer states:

 The temperature output in the footwell area is too cool for the customer. The footwell temperature selected by the customer is perceived to be inconsistent as it relates to the overall temperature setting the customer has selected for the cabin.

Workshop findings:

• The customer concern can be reproduced.

The concern presents with the HVAC system set to 'Auto', the zones synchronized, the HVAC system in a regulation function close to the desired set temperature and outside temperatures between approximately $-5^{\circ}C$ (23°f) to $+10^{\circ}C$ (50°f).

Technical Background

The customer's desired cabin temperature setting does not deliver a comparatively similar temperature in the footwell. In spite of the cabin temperature selected by the customer they may feel that the air temperature delivered to the footwell area is cooler than desired.

Production Solution

There has been a refinement of the air temperatures delivered to the cabin and the foot well that are more consistent with one another by way of a ZDC change in the vehicle electrical system control module, J519 (address word 0009) in production.

Service

SVM Update Instructions

- 1. Follow all instructions in TSB 2011732: 00 Software Version Management (SVM), operating instructions.
- 2. Update the vehicle electrical system control module, J519 (address word 0009) using SVM code 09A046.
