Subject: Convertor Dolly Frame

James and Brian,

We are going to have to swap all the parts from D4572 onto the new frames you have. That included Axle, air and electrical. I know that the new counterweight on the new frame has to have around 50lbs of steel shot sand put in it. I will work to order.

Please let me know if you think you will need anything else.

Thanks,

VIN: HK268027
