

Service Campaign T4C Dealer Best Practice

Date: October 28, 2019

Attn: Dealer Principal/General Manager/Service Manager/Parts Manager

Subject: Service Campaign T4C: Ioniq NVLD Air Filter Kit Replacement (TSB #19-01-030H) – v1

Updates To This Document	Date
<ul style="list-style-type: none"> Initial communication to dealers. 	10/28/19

***** Dealer Stock and Retail Vehicles Only *****

Dealers must perform this Service Campaign on all affected vehicles prior to customer retail delivery and whenever an affected vehicle is in the shop for any maintenance or repair.

Affected Vehicles

Hyundai is conducting a Service Campaign to install a new Air Filter Kit with an updated filter to help prevent DTC P0456 on certain 2017-2019 Ioniq (AE) HEV vehicles.

The affected vehicles include:

- Certain 2017-2019 Ioniq (AE) HEV

Hyundai is initiating this action to ensure the quality of its vehicles and the continued satisfaction of Hyundai customers.

Description

Some vehicles may experience check engine light on with the following DTC found stored:

- DTC P0456 - Evaporative System (EVAP) - Very Small Leak

The issue has primarily occurred in CA State areas that are subject to marine layer cloud cover. Salt particulate deposit can form inside the Natural Vacuum Leak Detection (NVLD) and may cause intermittent operation setting the DTC P0456.

This service campaign provides the procedure to install a new Air Filter Kit with an updated filter to help prevent entry of the salt particulates.

In addition, vehicles with check engine light On and DTC P0456 found stored in the Engine Control Module (ECM) must also replace the NVLD part.

Service Action

Reservation – Always check the Vehicle Information Screen in WebDCS for open campaigns and recalls, and advise the customer on time requirements.

Readiness – Review this announcement and the accompanying FAQs with all Service and Parts staff including Reservationist/BDC. Also, complete all applicable training, check your reservation capacity settings (you can set separate capacities for every recall/campaign), confirm email addresses for campaign appointments, and that you have all necessary tools, campaign parts and shop equipment as needed.

Reception – Always check the Vehicle Information Screen in WebDCS for open campaigns and recalls, and print a copy for technicians. Provide SRC or an alternative vehicle, as needed. If a customer has declined the campaign, note this on the repair order and request the customer’s signature next to the statement.

- Eco-friendly vehicle owners should be provided an equivalent eco-friendly SRC, or alternative transportation, as needed.

Repair – Always plug in the GDS before starting the repair. Make sure to complete an MPI on all vehicles and Quality Control your work.

- Use Greeters, Porters and Service Consultants to bring vehicles to Technicians to make it easier for them to stay working in the bay.
- Use a jack stand to support the fuel tank after loosening the fuel tank band mounting nuts during the air filter replacement process.
- Please check to ensure that the replacement Air Filter Kit includes CCV, extension wire and upper & lower hose.
- Only replace NVLD in the event of check engine light On with DTC P0456 found stored in the ECM.
- Perform GDS Evap Leak test according to the GDS instructions to confirm that the installation of new parts and hoses are secure without a system vacuum leak.

Return – Review all completed campaign and repairs to answer any customer questions. Also, schedule the customer's next service.

Reconnect – Follow up for customer satisfaction.

Parts

Please review parts as outlined in the corresponding TSB (TSB #19-01-030H).

Customer Notification

None

Thank you for your prompt attention to this important matter and continued commitment to Hyundai customers.
