IND

Communication #: I-19-09-02

Model Year(s): 2014 – Current

— Confidential and Proprietary —

VERSION: R01 (September 27, 2019)

IMPORTANT

If you are working with a printed copy, please verify you have the most current version of this document.

SUBJECT: INDIAN MOTORCYCLE FUEL CHAPTER UPDATES PURPOSE

Updated information has been added to all Indian Motorcycle Service Manuals to provide dealers with clear directions when servicing the fuel system. Be sure to reference the applicable Service Manual for the most accurate information.

IMPORTANT UPDATES INCLUDE:

Fuel line quick connection removal:

Do not use anything other than fingers to remove the quick connection. The use of tools can damage the connection resulting in a fuel leak.

Fuel line quick connection installation:

Verify fuel line is properly seated and locked in place by listening for an audible “click” when pressing into place. Pull gently on quick connection once seated to ensure a proper connection has been made.

Checking the fuel system for leaks:

Prime the fuel system by turning the run/stop switch on and then off. Once the system is pressurized, carefully check all fuel connections, joints, and lines for leaks.
