

Service Campaign T4F Dealer Best Practice

Date: October 29, 2019

Attn: Dealer Principal/General Manager/Service Manager/Parts Manager

Subject: Service Campaign T4F: BATTERY SENSOR DATA AND MISFIRE ECM UPDATE (TSB #19-01-034H) – v1

Updates To This Document	Date
<ul style="list-style-type: none"> Initial communication to dealers. 	10/29/19

*** Dealer Stock and Retail Vehicles ***

Dealers must perform this Service Campaign on all affected vehicles prior to customer retail delivery and whenever an affected vehicle is in the shop for any maintenance or repair.

Affected Vehicles

Hyundai is conducting a Service Campaign to perform an ECM software update to revise the battery sensor data to optimize SOC (State of Charge) value. The ECM Update also includes an update for misfire due to learning cylinder imbalance.

The affected vehicles include:

- 2020MY Veloster (JS) with 2.0L GDI engine

Hyundai is initiating this action to ensure the quality of its vehicles and the continued satisfaction of Hyundai customers.

Description

This campaign is to perform an ECM software update to revise the battery sensor data to optimize SOC (State of Charge) value and for misfire due to learning cylinder imbalance.

Service Action

 **Reservation** – Always check the Vehicle Information Screen in WebDCS for open campaigns and recalls, and advise the customer on time requirements.

- This campaign can be completed quickly and does not require a hoist.

 **Readiness** – Review this announcement and the accompanying FAQs with all Service and Parts staff including Reservationist/BDC. Also, complete all applicable training, check your reservation capacity settings (you can set separate capacities for every recall/campaign), confirm email addresses for campaign appointments, and that you have all necessary tools, campaign parts and shop equipment as needed.

 **Reception** – Always check the Vehicle Information Screen in WebDCS for open campaigns and recalls, and print a copy for technicians. Provide SRC or an alternative vehicle, as needed. If a customer has declined the campaign, note this on the repair order and request the customer’s signature next to the statement.

 **Repair** – Always plug in the GDS before starting the repair. Make sure to complete an MPI on all vehicles and Quality Control your work.

- Use Greeters, Porters and Service Consultants to bring vehicles to Technicians to make it easier for them to stay working in the bay.
- You must initially perform GDS ECU Update in Auto Mode. If the ECU Update starts but then fails in Auto Mode, perform the update in Manual Mode to recover.
- Make sure the battery voltage does not fall below 12 volts. Keep a charger connected to the battery or run the vehicle for 20 minutes to ensure an adequate state of charge for reliable update results.

Return – Review all completed campaign and repairs to answer any customer questions. Also, schedule the customer's next service.

Reconnect – Follow up for customer satisfaction.

Parts

No additional parts are required to complete this campaign.

Customer Notification

None

Thank you for your prompt attention to this important matter and continued commitment to Hyundai customers.
